- **CONTRACTOR:** Mace

The Shard is a skyscraper in Southwark, London. Standing almost 310 metres (1,020 ft) tall, it is the tallest building in the European Union. The tower has 72 habitable floors and contains premium office space, a hotel, luxury residences, retail space, restaurants, a 15-storey public viewing gallery, and a spa.

It was designed with an irregular pyramidal shape from the base to the top, and is clad entirely in glass. Shard London Bridge's structure was completed in November 2012, and it was opened to the public on 1st February 2013.

As well as having ECO Highline 270 fan coil units throughout The Shard, Diffusion also supplied bespoke Oasis air curtains for the viewing gallery which is situated on floors 68, 69 and 72.
